

# No plan after graduation?

*Train for a career through Great Oaks' programs for adults!*

**Start a career soon.** You can earn professional certification in 10 months or less.

**Work while you're learning.** Most classes are 4:30-10:30 pm, meaning you can work during the day (or sleep late if you'd like!).

**Earn a year of college credit.** Great Oaks 900-hour programs count as a year of college toward an Associate's Degree in Technical Studies.

**It's hands-on.** Learn with your hands as well as your mind.

**Minimal out-of-class time.** For most programs, there are few outside assignments.

**Be ready for a career!** High job placement rates, and a great reputation with area employers, means your Great Oaks education makes you well-prepared. (Go to [www.greatoaks.com/ge](http://www.greatoaks.com/ge) for complete placement information.)

**Small classes mean students count.** You'll typically work with the same 18-24 classmates and instructor for your entire time here.

**Math and English are embedded in the program.** You won't take separate classes; you'll sharpen these skills as you learn your career.

**Use the equipment that you'll use on the job.** No pretending; if you're interested in diesel repair, you'll be working with diesel trucks. Dental assisting? The lab is set up as a dental office. Electro-mechanical maintenance? You'll program PLCs and troubleshoot electrical motors. The equipment and tools you use are professional-standard.

**Financial aid is available to those who qualify.** Great Oaks' 900-hour programs qualify for federal financial aid.

## Less than a year from start to career!

**Come and learn about programs, talk to employers, and tour the labs.**

**Wednesday, December 3 7:00 pm**

Scarlet Oaks Career Campus, Entry 1  
3254 E. Kemper Road  
Cincinnati, OH 45241
